Note 3 of the consolidated financial statements at March 31, 2019, describes all of the Company’s significant accounting policies and a description of changes made during the 2019 fiscal year is included therein. During the three-month period ended June 30, 2019, the Company’s critical accounting estimates and significant accounting policies have remained substantially unchanged. The Reader is referred to Note 3 of the March 31, 2019 financial statements.

All amounts presented in this document are stated in Canadian dollars, the functional and reporting currency of the Company, except where otherwise noted.

Cautionary Note Regarding Forward Looking Statements

This Management’s Discussion and Analysis is intended to supplement and complement the unaudited condensed consolidated financial statements of the Company for the three month period ended June 30, 2019 and the annual consolidated financial statements for the years ended March 31, 2019, and the notes thereto (collectively the “Financial Statements”). Readers are encouraged to review these Financial Statements in conjunction with a review of this Management’s Discussion and Analysis. Certain notes to the Financial Statements are specifically referred to in this Management’s Discussion and Analysis and such notes are incorporated by reference herein. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those implied by the forward-looking statements. These forward-looking statements are based on, but not limited to, material assumptions including: title to the Company’s exploration properties; the level and suitability of exploration expenditures relating to those properties, including decisions regarding the impairment of mineral property expenditures; rehabilitation requirements; commodity prices; access to funding and capital markets conditions generally; various accounting estimations related to income taxes, share based payments and the valuation of available for sale securities; a sufficiently stable and healthy global economic environment; and other expectations, intentions and plans contained in this MD&A that are not historical fact.

When used in this MD&A, the words “plan,” “expect,” “believe,” and similar expressions generally identify forward looking statements. These statements reflect current expectations. They are subject to a number of risks and uncertainties, including those factors disclosed under Risks and Uncertainties below. In light of the many risks and uncertainties, readers should understand that the Company cannot offer assurance that the forward-looking statements contained in this analysis will be realized.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statements were made, and readers are advised to consider such forward-looking statements in light of the risks as set forth below.

Corporate Overview

The Company became a reporting issuer in the Provinces of Alberta, British Columbia and Ontario on May 14, 2004. The Company has traded on various exchanges since inception, and currently trades on the following exchanges:

Canadian Stock Exchange (CSX: EVG since July 25, 2014)
NASDAQ (OTCBB: EVOGF since 2005)
Frankfurt Stock Exchange (EV7 since 2007)

Description of Business

Evolving Gold Corp. ("Evolving" or the "Company") is a Canadian-based mining exploration company engaged in the acquisition, exploration and development of natural resource properties.

The Company's focus is Canadian based mineral exploration properties, including the Lithium Lakes, Toro and Oxen properties located in Quebec, Canada.

Changes in Management, Directors, and Corporate Activities

On September 9, 2018, the Company announced that it had executed a non-binding letter of intent to acquire Bocana Resources Ltd., a private company with mineral property interests in South America. On November 7, 2018, the Company signed the definitive agreement with Bocana to proceed with the transaction.

The proposed acquisition of Bocana constituted a "fundamental change" for Evolving Gold under Canadian Securities Exchange policies -- and consequently the Company was halted trading of its common shares on the CSE.

On October 2, 2019, the Company announced that the term of the signed Bocana amalgamation agreement had expired at the end of March 2019, and that the parties had been unable to negotiate terms to continue the agreement. As a result, the agreement was terminated.

The Company is focused on obtaining a revocation of the British Columbia Securities Commission cease trade order issued Aug. 2, 2019. Thereafter EVG will be seeking new business opportunities.

There were no changes in management or directors during the period.

Mineral Properties

During the three-month period ended June 30, 2019, the Company evaluated its existing properties and conducted minimal work, including property expenditures noted related to Jake Creek to allow for the return of bonds held by various regulatory bodies, and general administrative costs of maintaining the subsidiary while the remaining bonds are outstanding.

Lithium Lakes

On June 16, 2016, the Company purchased the Lithium Lakes Property in Quebec, Canada. Pursuant to the purchase agreement, the Company issued to the vendor a total of 300,000 common shares fair valued at \$0.31 per share (\$93,000). The Company also paid the vendor \$40,000. The Lithium Lakes claims are subject to a 1% net smelter returns royalty, whereby the Company will have the right, at any time, to acquire one-half of the royalty by paying \$500,000 to the royalty holder.

Toro

On October 21, 2016, the company claimed the Toro Property in the James Bay area of the Quebec province (Canada). It consists in 324 generally contiguous claims in nine blocks, covering about 17,224 hectares. The area is prospective for gold and base metals. During the year ended March 31, 2017, the Company increased its land position by staking several claims adjacent to its existing mineral claims.

For the three-month period ended June 30, 2019

Nicobi

On January 27th, 2017, the Company claimed the Nicobi Property in the Abitibi area of the Quebec province (Canada). It consists in 57 contiguous claims, covering about 3,193 hectares. The area is prospective for gold and base metals.

Oxen

On February 7th, 2017, the Company acquired the Oxen Property in the Ungava Bay area of the Quebec province (Canada). It consists in 17 contiguous claims, covering about 788 hectares. The area is prospective for gold and base metals.

Jake Creek Property

The Jake Creek Property was located in northern Humboldt County, Nevada, approximately 45 miles northeast of Winnemucca, and consisted of 699 generally contiguous, unpatented mining claims covering approximately 14,405 acres. The Company was the sole owner of the Jake Creek Property claim block and held an undivided 100% interest. As of September 30, 2016, the Company allowed the claims to lapse, and accordingly the Company no longer has any interest in these claims.

The Company's exploration and evaluation expenditures for the three-month period ended June 30, 2019 and the year ended March 31, 2019 are:

Results of Operations

The results for the three-month period ended June 30, 2019 and 2018 are as follows:

	Three-month period ended	
	June 30,	
	<u>2019</u>	<u>2018</u>
Loss for the period	\$(71,705)	\$(122,538)
Comprehensive income (loss) for the period	\$(71,413)	\$(264,646)
Basic and diluted loss per share	\$(0.00)	\$(0.02)

On an operating basis, the loss for the three-month period ended June 30, 2019 was \$71,705 (2018 \$(122,538)). The principal change in 2019 compared to 2018 was the reduction of 1) Office expenses from \$65,894 to \$26,630, and 2) mineral property expenditures to \$2,740 in 2019 from \$14,715 in 2018 due to a lack of funds to explore as well as the Company being halted from September 2018 to year end due to the proposed Bocana acquisition. Most other expenses were also reduced as the Company worked to reduce costs.

On a Comprehensive basis, the 2019 loss was \$71,413 compared to \$264,646. In addition to the expense reductions above, the Company recognized a loss of \$130,000 as a result of the sale of marketable securities in Q1 2018.

Evolving Gold Corp.
Management Discussion and Analysis
For the three-month period ended June 30, 2019

The operating expenditures reflect the following:

- Amortization of \$318 (2018: \$991) reflects the reduced amounts of depreciable assets of the Company. Subsequent to the period end, the Company disposed of all its depreciable assets upon the termination of its office lease;
- Bank charges and interest of \$716 (2018: \$526) varied due to the amounts on deposit and activity in the accounts. No interest was accrued as being payable on the loans received, as subsequent to the period end, the loan and accrued interest was written down based on the mutual cancellation of the Bocana agreement. See Events after the reporting period;
- Legal expense of \$824 (2018: \$524) primarily reflects work performed to commence the transaction with Bocana, as well as normal regulatory and corporate activities;
- Management fees of \$37,500 (2018: \$37,500) are unchanged over the period;
- Office expense of \$26,630 (2018: \$65,894) reflect the cost to maintain the operations of the Company, primarily with respect to the head office of the Company and general corporate expenses. Expenses were lower overall due to cost controls implemented;

	Year ended	
	June 30,	
	2019	2018
Administration	\$ 3,561	\$ 22,512
Trade shows, marketing and promotion	-	20,912
Rent	23,069	22,470
	<u>\$ 26,630</u>	<u>\$ 65,894</u>

- Transfer agent and filing fees of \$2,977 (2018: \$2,388) reflect the ongoing costs to maintain listings, transfer services and the timing of corporate activities including preliminary cost of the annual general meeting.

Non-operating items affecting the loss for the period include:

- A realized loss on the disposition of marketable securities of \$130,000 in 2018. There are no marketable securities in 2019;
- Foreign exchange was a gain of \$175 (2018: a loss of \$12,108). The higher volatility and reduced value of the Canadian dollar relative to the US dollar during the periods contributed to the variations; and
- Interest income was \$117 during the quarter compared to \$nil in Q1 2018.

Interest Income

Interest income fluctuated with the amount of interest earning assets held and the interest rate earned thereon.

Net Loss

Net loss varies based on normal corporate expenditures and certain periodic expenses, such as share-based compensation and gains on the sale of marketable securities. Stock-based compensation varies with the timing of vesting of option grants. A gain on sale of marketable securities is recorded when a sale occurs.

Working Capital

Working Capital for many quarters presented above decreased due to exploration and administrative costs, and increased when assets were sold, recorded as held for sale, or when debt settlements occurred.

Capital Expenditures

During the three-month period ended June 30, 2019, the Company incurred net capital expenditures of \$nil (March 31, 2019 - \$nil).

Management Discussion and Analysis
For the three-month period ended June 30, 2019**

Financing Activities

During the three-month period ended June 30, 2019 and the year ended June 30, 2019, the Company did not engage in any financing activities.

Liquidity and Capital Resources

The Company's aggregate operating, investing and financing activities for the three-month period ended June 30, 2019 resulted in a cash decrease of \$16,390 (March 31, 2019: \$227,618). As at June 30, 2019, the Company's cash and cash equivalents balance was a deficit of \$(184) (March 31, 2019: \$16,205) and the Company had a working capital deficit of \$343,748 (March 31, 2019: working capital deficit of \$272,653).

The Company has not yet put into commercial production any of its mineral properties and as such has no operating revenues. Accordingly, the Company is dependent on the equity markets as its sole source of operating working capital. The Company's capital resources are largely determined by the strength of the junior resource markets and by the status of the Company's projects in relation to these markets, and its ability to compete for the investor support of its projects.

The Company will continue to require funds to meet its obligations and as a result, will have to continue to rely on equity and debt financing during such period. There can be no assurance that financing, whether debt or equity, will always be available to the Company in the amount required at any particular time or for any particular period or, if available, that it can be obtained on terms satisfactory to the Company.

The Company continues to review its mineral property holdings on an annual basis. The Company does not have any other commitments for material capital expenditures either in the near or long term over normal operating requirements and none are presently contemplated other than as disclosed above.

Transactions with Related Parties

Key Management Compensation

Key management personnel are persons responsible for planning, directing and controlling the activities of an entity, and include the Company's CEO and CFO. Payments to key management are recorded as management fees. Share-based payments were incurred for both key management and directors. No directors' fees were paid during the applicable years.

The following key management compensation was incurred:

	Three Months ended June 30,	
	2019	2018
Management fees and salaries	<u>\$ 37,500</u>	<u>\$ 37,500</u>
	<u>\$ 37,500</u>	<u>\$ 37,500</u>

Management fees are payable in Canadian dollars. After allowing for offsetting accruals, write-downs, expense allocations and disbursements, unpaid and accrued management fees as of March 31, 2019 were \$125,000 (March 31, 2019 \$87,500).

Off Balance Sheet Arrangements

To the best of management's knowledge, there are no other off-balance sheet arrangements that have, or are reasonably likely to have, a current or future effect on the results of operations or financial condition of the company.

Critical Accounting Estimates and Changes in Accounting Policies

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The estimates and assumptions of the Company are set out in Note 4 to the annual audited Consolidated Financial Statements as of and for the year ended March 31, 2019, which are incorporated herein by reference. The reader is referred to those statements for a detailed discussion of the accounting policies.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the year of the change, if the change affects that year only, or in the year of the change and future years, if the change affects both.

The assumption that the Company will be able to continue as a going concern is subject to critical judgments of management with respect to assumptions surrounding the short- and long-term operating budget, expected profitability, investing and financing activities, and management's strategic planning. Should those judgments prove to be inaccurate, management's continued use of the going concern assumption could be inappropriate.

Future Accounting Changes

The Company did not adopt any new or amended standards for the year beginning April 1, 2019.

Recent Accounting Pronouncements

Numerous new standards, amendments and interpretations to existing standards have been issued but are not yet effective. Below is the new standard that is likely to be relevant to the Company. However, management has yet to assess the impact on the Company's operations.

IFRS 16 New accounting standard that replaces IAS 17, IFRIC 4, SIC 15, and SIC 27 for the recognition, measurement, presentation, and disclosure of leases for both the lessee and lessor (effective for annual periods beginning on or after January 1, 2019).

The Company has not early adopted this standard, and as the Company does not have any leases over one year to maturity, the standard is not expected to have a material impact on the results and financial position of the Company when the standard is adopted.

Financial Instruments

The Company is exposed through its operations to the following financial risks:

- Market Risk
- Credit Risk
- Liquidity Risk

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these audited consolidated financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous years unless otherwise stated.

General Objectives, Policies and Processes:

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies and, while retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure the effective implementation of the objectives and policies to the Company's finance function.

The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility. Further details regarding these policies are set out below.

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market prices. Market prices are comprised of four types of risk: foreign currency risk, interest rate risk, commodity price risk and equity price risk.

Interest Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company is not exposed to significant interest rate risk due to the short term to maturity of its financial instruments.

Commodity Price Risk

Commodity price risk is the risk that the fair value or future cash flows of financial instruments will fluctuate as a result of changes in commodity prices. The Company is not exposed to significant commodity price risk as the Company does not hold significant marketable securities.

Foreign Currency Risk

Foreign currency risk is the risk that a variation in exchange rates between the Canadian dollar and US dollar or other foreign currencies will affect the Company's operations and financial results. The Company has significant exposure to foreign exchange rate fluctuation. The Company is exposed to currency risk to the extent that monetary assets and liabilities held by the Company are not denominated in United States dollars. The Company has not entered into any foreign currency contracts to mitigate this risk. The Company holds balances in US dollars that could give rise to exposure to foreign exchange risk.

Sensitivity to a plus or minus 10% change in the foreign exchange rate of the US dollar to the Canadian dollar would affect the reported loss and comprehensive loss by approximately \$1,102 (March 31, 2019: \$900) as detailed below:

United States Dollar Denominated Balances	June 30, 2019	March 31, 2019
Cash	\$ -	\$ (8)
Accounts payable	(11,082)	(8,988)
	\$ (1,102)	\$ (8,996)
10% change in exchange rate impact	\$ (1,102)	\$ (900)

Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Financial instruments that are potentially subject to credit risk for the Company consist primarily of cash and cash equivalents. Cash and cash equivalents are maintained with financial institutions of reputable credit and may be redeemed upon demand.

Evolving Gold Corp.
Management Discussion and Analysis
For the three-month period ended June 30, 2019

The carrying amount of financial assets represents the maximum credit exposure. The Company has gross credit exposure at June 30, 2019 and March 31, 2019 relating to cash and cash equivalents of \$184 and \$16,205, respectively, held in deposits at a Canadian chartered bank. The Company considers this credit risk to be minimal for all cash and cash equivalent assets based on changes that are reasonably possible at the reporting date

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's policy is to ensure that it will always have sufficient cash to allow it to meet its liabilities when they become due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The key to success in managing liquidity is the degree of certainty in the cash flow projections. If future cash flows are fairly uncertain, the liquidity risk increases.

Typically, the Company ensures that it has sufficient cash on demand to meet expected operational expenses. To achieve this objective, the Company prepares annual capital expenditure budgets, which are regularly monitored and updated as considered necessary. Further, the Company utilizes authorizations for expenditures on exploration projects to further manage expenditures.

The Company monitors its risk of shortage of funds by monitoring the maturity dates of existing trade and other accounts payable.

The following table sets out the contractual maturities (representing undiscounted contractual cash flows) of financial liabilities:

Accounts payable and other liabilities	Up to 3 months	Between 3 and 12 months	Between 1 and 2 years	Over 5 years	Total
June 30, 2019	\$ 229,170	\$ 88,198	\$ -	\$ -	\$ 357,368
March 31, 2019	\$ 229,906	\$ 70,198	\$ -	\$ -	\$ 300,104

Determination of Fair Value

Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

The consolidated statement of financial position carrying amounts for cash and cash equivalents and trade and other payables approximate fair value due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

Risks and Uncertainties

Natural resources exploration, development, production and processing involve a number of business risks, some of which are beyond the Company's control. These can be categorized as operational, financial and regulatory risks.

Operational risks include: the Company may not be able to find and develop reserves economically, the Company cannot guarantee title to its properties, the Company may have difficulty in marketing production and services, the Company must manage changing governmental law and regulations, the Company may have difficulty in hiring and retaining skilled employees and contractors, there are significant risks and hazards related to mining that are beyond the Company's control, there is no assurance that the Company will acquire additional mineral properties and any acquisitions may expose the Company to new risks, and the mining industry is intensely competitive for the acquisition of new properties, access to capital and hiring of skilled personnel. The Company continuously monitors and responds to changes in these factors and adheres to all regulations governing its operations.

Financial risks include commodity prices, interest rates and fluctuating foreign exchange rates, all of which are beyond the Company's control. Additional financial risks are the Company's ability to raise capital to continue funding its operations.

Regulatory risks include the possible delays in getting regulatory approval to, and permits for, the transactions that the Board of Directors believe to be in the best interest of the Company, and include increased fees for filings, the introduction of ever more complex reporting requirements the cost of which the Company must meet in order to maintain its exchange listing.

Events after the reporting period

The Company has evaluated its activities subsequent to June 30, 2019 and has determined that the following are material events to be reported:

- On October 2, 2019, the Company announced that the proposed reverse takeover by Bocana resources Ltd., which had been announced in 2018, had been terminated. As a result of a mutually agreed settlement, the loan received from Bocana had been forgiven.
- At July 31, 2019, the Company ended its lease at its previous office. As a result of the end of the lease, the Company sold or otherwise disposed of all of its furniture, office equipment and computers.
